BEN FLORENCE AJ E. TIL

JUNIOR FULL-STACK DEVELOPER
benflorence.dev@gmail.com | (+63) 963 151 2988
benflorence.work | github.com/benajtil | linkedin.com/in/benzajtil

SUMMARY

Computer Science graduate with hands-on experience building web applications and desktop systems using PHP, JavaScript, React, Python, and SQL databases. Contributed to offline-first applications used during live festival operations and developed projects involving REST APIs, session-based authentication, role-based access control, and data analysis. Seeking a junior full-stack development role.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern Jun 2024 – Aug 2024
EULAP — Koronadal, South Cotabato

Built and deployed 3 desktop applications using PHP, JavaScript, Electron, and MySQL, used in real operations

- Worked on three desktop applications using PHP, JavaScript, Electron, and MySQL for festival operations across multiple municipalities.
- Worked on offline-first functionality and synchronization between a local database and a central server to support unstable connectivity.
- Helped resolve a deployment mismatch during live event operations and restore functionality using a manual fallback fix.
- Performed testing and helped identify and fix issues before or after releases.

PROJECTS

KOMU — Barangay-Based Social Platform | 2026
PHP · React · PostgreSQL | GitHub: github.com/benajtil/Komu_Web

- Built the main features of a location-focused social platform with separate roles for citizens, barangay administrators, municipal administrators, and super administrators.
- Developed REST API endpoints and a PostgreSQL schema for user verification, moderation, and administrative workflows.
- Implemented session-based authentication and role-based access control for different user roles.

LakbayMarista Tourist — Tourism Discovery Platform | 2024
HTML · CSS · JavaScript · PHP · Google Maps API | Live: lakbaymarista.online

- Collaborated with a four-person team to build and deploy a website for discovering, searching, and reviewing tourist attractions.
- Contributed to frontend and backend features, including search and filtering, favorites, reviews, and Google Maps integration.

Offline Tabulation System | 2024
PHP · JavaScript · SQLite

- Built a scoring system for judges to enter results during live event operations.
- Worked on offline data synchronization between a local database and a central server and helped debug issues during the event.

Customer Intelligence Dashboard | 2025
Python · Data Analysis

- Built a dashboard to explore transaction data and customer segments using Python and data-analysis libraries.
- Grouped customers by behavioral patterns and prepared marketing recommendations based on the resulting segments.

EDUCATION

Bachelor of Science in Computer Science | 2021 – 2025
Notre Dame of Marbel University

TECHNICAL SKILLS

Languages & Frameworks: PHP, JavaScript, React, Python
Databases: PostgreSQL, MySQL, SQLite
Tools & Technologies: Git, Vite, Electron, Tailwind CSS
Concepts: REST APIs, session-based authentication, role-based access control, offline-first systems, data analysis
